Experience the Miracle of Threads

PDO Threads

PDO Threads

The PDO suture, or thread is a synthetic and biodegradable monofilament suture which was developed in the 1970's. Its surface has a coating smoother than that of catgut sutures. Miracu, PDO Threads are available in Forte Basic, Mono Basic, Screw Basic, Barb Uni, Barb Bi, and Barb 4D, and are able to be utilized in many parts of the body. Miracu, PDO Thread remain in the body up to 240 days. Thereafter, the PDO suture is then converted into water and carbon dioxide, and is fully absorbed without any residue, through a process known as hydrolysis. The resulting effects of Miracu, PDO Threads, are typically seen up to 24 months.
